Philips DVP5980_12

Work on this firmware was started by **tech25** and then by **MTZ**
They add to this custom mod:

1. Autoload subtitles
2. For avi files "GoTo: h:mm:ss". When play avi files press "Title" 2 times and enter H:MM:SS to jump to moment you want.
3. 3 Fonts for subtitles (Standard, Small and Large).
4. New position for subtitle.

What I add...

- New skins
- New filebrowser with scrollbars, outline font (8 char from USB, and from CD/DVD limit to "yellow band" - intelligent file cutter, max. 64 char.)
- 3 MP3 TAG and Jpeg preview in a new position
- New icons for files.
- DivX Subtitle in "General Page"
- Menu for font color (text and background).
- Add 2 color for subtitles. New menu is after "DivX Subtitle".

Color

- Default (white text)
- Cool (yellow text, some user prefer this).

- Add 2 option for subtitle background. New menu is after "Color".

Color

- Default (transparent background)

- Black Level (black background).
- "Load Original Subtitles, if not find load all" without menu.
- WordWrap and Reformat (if subtitles line is long, automatic make wrap)
- OSD font with outline, better contrast for all OSD message.
- DVD Quick play (with menu - on or off). If on, when play DVD's, skip menu and play directly movie. (in "Preference Page")

DVD-Video

- With menu
- Without menu
- Volume +/- on "Repeat keys". Volume level is stored.
- Add a version with UnicodeToCp for CP 1251.

Very important! Before upgrade SET OSD LANGUAGE TO ENGLISH.

Instruction for upgrading [HERE](#)

Version for CP 1250, 1251, 1252, 1253 and 1254 (CP = [Code Page](#))

Steve Schobinger say:

Do not open the system as there is a risk of electric shock. If a fault occurs, first check the points listed below before taking the system for repair. If you are unable to remedy a problem by following these hints, consult your dealer or Philips for help. Problem No power.
